

EDOCERE MEDICOS

Vesalius, Andreas

De humani corporis fabrica libri septem, Basilea, 1543

(Descrizione fisica [14] c. : ill. ; atlantico)

Biblioteca Teresiana Collocazione XXXIII.E.1

Andrea Vesalio (1514-1564).

La sua preparazione culturale, avvenuta a Lovanio e poi a Parigi, maturò definitivamente a Padova e si basa ovviamente sulla dottrina galenica e l'impianto che lui stesso ha voluto dare alla sua opera principale, De humani corporis fabrica libri septem, ne è la prova. La critica al maestro è relativa rispetto all'attacco che invece fu portato all'impianto del sapere e del modo di trasmetterlo secondo il canone scolastico. Al di là del rilevamento degli errori di Galeno, peraltro evidenziati anche da altri valenti anatomisti prevesaliani, l'impianto fisiologico umorale del medico di Pergamo non fu mai messo in discussione. Accanto al successo che l'opera ebbe, la Fabrica, ed il suo autore furono avversati non poco negli ambienti accademici ove ancora l'anatomia si insegnava sul testo di Mondino.
